Tour Type:
continuous

Tour Itinerary

Day 1 : Safari Day 1: Tarangire National Park

On the first day of the safari we will visit the **Tarangire National Park**, which covers an area of 325km² between Arusha and Lake Manyara. In this park we will be able to see the first animals in the wild such as **elephants, zebras and Thomson's Gazelles**. With a bit of luck we will also see some of the world's most imposing predators such as **lion, leopard and hyena**. In the evening we will stay at either the Tarangire camping area or the Tarangire Safari Lodge, a hotel located in the park, depending on which option we have chosen. From both we will

be able to enjoy the sunset views of the park while having a drink or coffee.

Day 2 : Safari Day 2: Serengeti National Park

A day's drive to the **Serengeti National Park**. We will have to get up early as the journey takes a few hours, but we will enjoy the calm and the colours of the early hours of the day in this area. On the way, we will have to cross the Ngorongoro, and after passing the crater (which we will not visit yet), we will arrive at the Serengeti where we will have lunch. In the afternoon we will have time to visit the park for a few hours, to which we will return tomorrow. We will stay inside the park: either in the **camping area or in the Serengeti Kati-Kati Tented**

Camp, depending on whether we choose a tent or a lodge.

Day 3 : Safari Day 3: Serengeti National Park

We **wake up in the middle of the Serengeti**, have breakfast and take advantage of the day to visit the park at leisure. The Serengeti is immense and it takes time and patience to enjoy it to the fullest, so we **will have the whole day** to do so. At sunset, we will return to our camping area or hotel, and enjoy the calm, and how the sky is changing in a thousand colours while we toast to the experience we are living.

Day 4 : Safari Day 4: Ngorongoro Crater

We get up and start our way back to **Ngorongoro Crater**, one of the most spectacular parks in Tanzania. Ngorongoro is the crater of a **volcano that erupted thousands of years ago**. Over time, species began to arrive and it now boasts one of the **most brutal ecosystems in the world**. Strolling through the crater, seeing how the animals live in harmony and contemplating the high walls that surround it will leave you speechless. If you also see one of the most difficult to see **Big Five**, the Rhino, you will have the best possible end to your safari. We will

sleep in the camping area near Ngorongoro if we have chosen this option, or in Ngorongoro Farm House if we have chosen the lodge option.

Day 5 : Safari Day 5: Lake Manyara

We get up for breakfast and set off for **Lake Manyara**, situated very close to Tarangire. This lake sometimes has **fewer tourists** than other parks, so you can **see the animals in more peace and quiet**. With a bit of luck you will be able to see the elephants and giraffes up close.
